The Coping Cat program originated from a structured cognitive-behavioral therapy (CBT) protocol developed by Philip C. Kendall, a pioneer in childhood anxiety treatment. The workbook is an extension of this program, designed to be used either within therapist-led sessions or as a guided self-help resource for children and their families. These include relaxation techniques, cognitive restructuring, problem-solving, and exposure to feared situations in a gradual, controlled manner. The workbook's structure is designed to be engaging and age-appropriate, featuring colorful illustrations, interactive exercises, and relatable scenarios. It aims to foster both understanding and practical application of anxiety management skills.
