this book studies relevant actors and practices of conflict intervention by african regional organizations and their intimate connection to space making addressing a major gap regarding what actually happens within and around these organizations based on extensive empirical research it argues that those intervention practices are essentially spatializing practices based on particular spatial imaginations contributing to

the continuous construction and formatting of regional spaces as well as to ordering relations between different regional spaces analyzing the field of developing practices of conflict intervention by the economic community of west african states ecowas and the african union au the book contributes a new theory oriented analytical approach to study african regional organizations ros and the complex dynamics of african peace and security based on insights from critical geography as such it helps to close an empirical gap with regard to the internal modes of operation of african ros as well as the lack of their theorization it demonstrates that contrary to most accounts intervention practices of african ros have been diverse and complexly interrelated involving different actors within and around these organizations and are essentially tied to the space making this book will be of key interest to students and scholars of african politics governance peace and security studies international or regional organizations and more broadly to comparative regionalism international relations and international studies

this book argues that the war on terror is a paradigmatic foreign policy that has had profound effects on domestic social order cameron develops an original framework which inverts the traditional analysis of foreign policy in order to interpret its impact upon subject formation through everyday practises of security and social regulation

shortly after the overwhelming victory of hamas in the 2006 parliamentary and municipal elections civil war broke out in the gaza strip between members of the two factions hamas and fatah the eu along with the us un and russia not only gave its support to fatah against hamas but also imposed a tough siege on the hamas government in an attempt to force it to accept the quartet s political conditions described by hamas leaders as unfair and impossible many observers are convinced that the eu s behaviour in this matter has been unreasonable and has conflicted with the eu s own democratic beliefs and values this book sheds light on the eu s policies in palestine mainly from 2003 2013 and provides a thorough examination of the inconsistencies and paradoxes in the eu discourse towards hamas and the determinants underlying such contradictions it explores the reasons behind the eu labelling the hamas a terrorist organization and discusses why the eu has boycotted its democratically elected body since 2006 significantly the book looks at whether the eu jeopardized its reputation and contravened its core normative values and objectives democracy promotion human rights the rule of law and fundamental freedoms by such a categorisation of hamas exploring the eu s policy towards hamas is vital for understanding how the relationship between the eu and the rest of the islamists in the middle east is perceived as it enables both sides to have a cognitive basis upon which to construct better relations this book based upon a vast spread of primary eu documents

and interviews will therefore be a valuable resource for those studying the arab israeli conflict political islamic movements the middle east peace process and anyone with an interest in european union foreign policy

after german unification former officers of the gdr state security service united with gdr professors and cultural managers to establish the east german committee of associations okv on the basis of encompassing oral history into this complex web of interest organizations and memory clubs bouma argues that these activists are driven by an epistemic nostalgia a longing for the time when their political understanding of the world was seemingly unchallenged far from constituting a second life of the stasi the main goal of okv associations has been to validate the personal biographies of their activists against the now prevalent view that the gdr was a state of injustice while the okv quickly adapted to the new legal procedures in post socialist germany their staunch defence of the gdr heritage complicates their relation to sed successor party die linke and other radical left parties and associations even when they share practical goals breaking new ground in the study of post socialist memory culture this book explains why former gdr cadres replicate gdr memory culture against their stigmatized status in unified germany

in 2012 youth action teams composed of experts from the competent national authorities and from the commission were established for the eight member states experiencing particularly high levels of youth unemployment the action teams had the objective of helping these member states make the best use of eu structural funding by directing unallocated funds including european social funds of around 10 billion euro from the 2007 2013 programming period to projects that supported job opportunities for young people and facilitated access to funding by small businesses through this audit the court assessed the extent of the redirection exercise in relation to the unallocated esf funding and the contribution made by the youth action teams in this regard in helping national authorities reallocate funds to projects that would make the biggest difference in the shortest time page 4 of cover

the primary goals of this project for jto and onr grant n00014 07 1 1060 were to further develop extinction imagers for use in the ocean environment and to extend the capabilities into the short wave ir swir extinction imaging is a method for determining the effective extinction coefficient over an extended path using a sensor at one end of the path it uses calibrated imagers to acquire the relative radiance of a dark target near the other the end of the path and the horizon sky in the direction of the dark target it is completely passive and thus covert and the hardware is robust and relatively inexpensive it uses rigorous equations which determine the extinction coefficient from the measured apparent contrast of the radiance of the dark target with respect to the horizon sky the project was very successful we found that the ocean surface could readily be used as a dark target in red and swir wavelengths both the red and the swir measurement results were excellent for daytime comparisons with standard instruments as well as uncertainty analysis indicated that extinction imagers provide

better measurements of the atmospheric extinction losses over extended paths than other methods of which we are aware our secondary goals were to address the night regime and to address slanted paths above the horizontal regarding night we found that the visible sensor acquired excellent data but the ocean surface was not a good dark target in our wavelengths recommendations on the handling of night are given in the report regarding the lines of sight above the horizon we developed a slant path algorithm that determines beam transmittance it performed very well recommendations are made regarding integration of these techniques for military applications
