natural languages offer many examples of displacement i.e. constructions in which a  
non local expression is critical for some grammatical end two central examples include  
phenomena such as raising and passive on the one hand and control on the other  
though each phenomenon is an example of displacement they have been theoretically  
distinguished movement rules have generated the former and formally very different  
construal rules the latter the movement theory of control challenges this differentiation  
and argues that the operations that generate the two constructions are the same the  
differences arising from the positions through which the displaced elements are moved  
in the context of the minimalist program reducing the class of basic operations is  
methodologically prized this volume is a collection of original papers that argue for this

approach to control on theoretical and empirical grounds as well the papers also develop and constrain the movement theory to account for novel phenomena from a variety of languages

freedom all the way up proposes four intertwined elements that make up the meaning of life self worth purpose identity and hope materialism atheism claim the universe has no meaning so there is no larger purposeful story into which we can place ourselves we are left on our own to construct meaning for our lives barrigar argues though that the universe possess god s meaning and purpose to provide the space and conditions by which to bring about the existence of agape capable beings in agape loving relationships with god and with others in effect the universe is a great freedom system designed by god with freedom built in all the way up from the big bang to the emergence of big brains and free will barrigar describes the emergence of this system through his novel agape probability account of god s design for the universe which integrates such disciplines as quantum physics statistical mechanics probability theory evolutionary psychology neuroscience and game theory this system sets up the conditions for a fundamental choice between autonomous freedom which focuses principally on self and agapic freedom which focuses principally on god and on others materialism chooses autonomous freedom but thereby introduces nihilism into each of the elements of meaning in turns out that nihilism is a much greater problem for materialism than suffering is for theism in contrast agapic freedom infuses self worth purpose identity and hope with god s agape love dispelling materialism s inherent nihilism freedom all the way up provides a dramatic new proposal for god and the meaning of life in our scientific and humanist age
