from the admiralty to the miner s strike from the battle of britain to eventual victory over nazi germany churchill oversaw some of the most important events the world has ever seen winning the nobel prize in literature for his personal writing and cautioning against a powerful soviet russia in his later years in office his larger than life and complex personality has continued to fascinate writers and historians in this comprehensive biography roy jenkins faithfully presents these events while also managing to convey the contradictions and quirks in churchill s character weaving together in depth analysis and brilliant historical research jenkins has succeeded in crafting this magnificent one volume account packed with insights that only a fellow politician can convey bringing to life the statesman writer speaker and leader churchill is packed with insights into one of the most important figures of the twentieth century

roy jenkins was a dominating figure in british politics across the four decades before his death in 2003 with an impact and legacy greater than many prime ministers of the period these essays by friends and associates of roy jenkins from every phase of his life chart his remarkable career with insight anecdote and empathy each contributor writes from a close and unique relationship with their subject

roy jenkins follows up churchill with a book of a very different shape short and semi autobiographical but also full of the wit and erudition which make that book such a success each of the

twelve cities are described with a mixture of architectural interest topographical insight and personal anecdote jenkins has three british cities cardiff which was the metropolis of his monmouthshire childhood birmingham which he represented in parliament for 27 years and glasgow which aroused in him an enthusiasm far transcending politics further afield there is paris brussels where he lived for four years as president of the european commission bonn and berlin surveyed from its pre war splendour through to its architectural resurgence of the 1990s naples and barcelona from lord jenkins s over a hundred visits to north america there emerge highly personal recollections of new york and a more objective view of the of chicago dublin so near to home and yet so distant makes up the dozen twelve cities is a fascinating and sparkling collection from one of our very finest writers

shortlisted for the 2014 samuel johnson prize shortlisted for the 2014 costa biography award longlisted for the 2015 orwell prize winner of the 2014 political book awards political biography of the year roy jenkins was probably the best prime minister britain never had but though he never reached 10 downing street he left a more enduring mark on british society than most of those who did as a radical home secretary in the 1960s he drove through the decriminalisation of homosexuality and the legalisation of abortion an early and consistent advocate of european unity he played a decisive role in achieving british membership first of the common market and then of the european union then in 1981 when both the conservative and labour parties had moved sharply to the right and left respectively he founded the centrist social democratic party sdp which ultimately paved the way for tony blair s creation of new labour on top of all this jenkins was a compulsive writer whose twenty three books included best selling biographies of asquith gladstone and churchill he was the embodiment of the liberal establishment with a genius for friendship who knew and cultivated everyone who mattered in the overlapping worlds of politics literature diplomacy and academia his biography is the story of an exceptionally well filled and well rounded life

jenkins has been a british cabinet minister president of the european commission and is chancellor of oxford university

in his time harry s truman was one of the most under rated presidents of the twentieth century succeeding the charismatic roosevelt he was often seen as an uninspiring leader a poor diplomat and a fumbling politician he was the first man to authorise the use of nuclear weapons and was in office at the time when the multiplicity of hopes which arose at the end of the second world war were inevitably disappointed nothing could be further from roy jenkins view of him this is the first biography of truman to be written by an author with anything approaching the subject s own range of political experience and roy jenkins brings to this book a quality of appreciation of truman s political skills which has not been seen before it is also the first biography to be written by a british author giving it a new objectivity on the international affairs which occupied so much of truman s presidency and by which he must be judged

age of promises explores the issue of electoral promises in twentieth century britain how they were made how they were understood and how they evolved across time through a study of general election manifestos and election addresses the authors argue that a history of the act of making promises which is central to the political process but which has not been sufficiently analysed illuminates the development of political communication and democratic representation the twentieth century saw a broad shift away from politics viewed as a discursive process whereby at elections it was enough to set out broad principles with detailed policymaking to follow once in office following reflection and discussion over the first part of the century parties increasingly felt required to compile lists of specific policies to offer to voters which they were then considered to have an obligation to carry out come what may from 1945 onwards moreover

there was even more focus on detailed costed pledges we live in an age of growing uncertainty over the authority and status of political promises in the wake of the 2016 eu referendum controversy erupted over parliamentary sovereignty should the will of the people as manifested in the referendum result be supreme or did mps owe a primary responsibility to their constituents and or to the party manifestos on which they had been elected age of promises demonstrates that these debates build on a long history of differing understandings about what status of manifestos and addresses should have in shaping the actions of government

this book considers a central issue of our time the relationship between the macroeconomic objectives of political parties in democratic countries and the legal framework of market economies the impressive panel of contributors examines social democratic policies on cartels market concentration and competition in different european countries spanning a hundred year period specifically the interwar period the initial postwar period the 1960s and 1970s the 1980s and 1990s and the 2000s this thought provoking volume challenges the dominant belief that the eu s economic system and competition policy were mainly influenced by neoliberal economic thinking instead showing that keynesian and social democratic positions played a major role in the emergence of this system it will be valuable reading for advanced students researchers and policymakers interested in modern economic history industrial organization political economy european legal history and political science
