the awareness and development of biodegradable surfactants pre dates current pressures by the environmental movement by nearly three decades wherein a responsible industry mutually agreed to replace hard non biodegradable components of household detergents by soft biodegradable alternatives without course to legislation the only requirement at that time was for surfactants used in detergents to exhibit a primary biodegradability in excess of 80 this referring to the disappearance or removal from solution of the intact surface active material as detected by specified analytical techniques this proved useful as observed environmental impacts of surfactants e.g visible foam on rivers are associated with the intact molecule test methods for primary biodegradability were eventually enshrined in eu legislation for nonionic surfactants directive 821242 eec amended 73 404ieec and for anionic surfactants directive 821243ieec amended 73 405ieec no approved test methods and resultant legislation have been developed for cationic and amphoteric surfactants to date the environmental classification of chemical substances which of course includes surfactants and associated risk assessment utilises a second criterion ready biodegradability this may be assessed by a number of methods which monitor oxygen uptake bod carbon dioxide production or removal of dissolved organic carbon doc some surfactants which comply with the above detergents directive are borderline when it comes to ready biodegradability

competitive examination preparation takes enormous efforts time on the part of a student to learn practice and master each unit of the syllabus to check proficiency level in each unit student must take self assessment to identify his her weak areas to work upon that eventually builds confidence to win also performance of a student in exam improves significantly if student is familiar with the exact nature type and difficulty level of the questions being asked in the exam with this objective in mind we are presenting before you this book containing unit tests some features of the books are the complete syllabus is divided into logical units and there is a self assessment tests for each unit tests are prepared by subject experts who have decade of experience to prepare students for competitive exams tests are as per the latest pattern of the examination detailed explanatory solution of each test paper is also given student is advised to attempt these tests once they complete the preparation revision of unit they should attempt these test in exam like environment in a specified time student is advised to properly analyze the solutions and think of alternative methods and linkage to the solutions of identical problems also we firmly believe that the book in this form will definitely help a genuine hardworking student we have put our best efforts to make this book error free still there may be some errors we would appreciate if the same is brought to our notice we wish to utilize the opportunity to place on record our special thanks to all faculty members and editorial team for their efforts to make this book
